JSTOR

Walker Art Center is collaborating with JSTOR to digitize, preserve and extend access to *Design Quarterly*

ACKNOWLEDGEMENTS

We gratefully acknowledge the assistance of the following individuals, firms and corporations in the preparation of material for this issue:

Dr. Martin Krampen, Institute of Design, University of Waterloo, Ontario, Canada and Hochschule für Gestaltung, Ulm, Germany; PLANNING AND DESIGN 66, a conference on computers in design and communication, June 1966, at the University of Waterloo, Ontario, Canada. The conference was arranged by Prof. Martin Krampen and its speakers contributed most of the articles presented in this issue;

Prof. Allen Bernholtz, Harvard University, Cambridge, Massachusetts and Edward Bierstone, University of Toronto, Toronto, Canada;

Prof. Steven A. Coons, Massachusetts Institute of Technology, Cambridge, Massachusetts;

William A. Fetter, Boeing Co., Seattle, Washington;

Edwin L. Jacks, General Motors Research Laboratories, Warren, Michigan. The article by Mr. Jacks first appeared as "DAC-1: A Computer System for the Study of Graphical Man-Machine Communication" in the General Motors Engineering Journal, Vol. 12, No. 2, and is published here by permission of General Motors Corporation;

Dr. Kenneth C. Knowlton, Bell Telephone Laboratories, Murray Hill, New Jersey;

Dr. Marvin L. Manheim, Massachusetts Institute of Technology, Cambridge, Massachusetts;

A. Michael Noll, Bell Telephone Laboratories, Murray Hill, New Jersey;

Kenneth G. Scheid, K. G. Scheid & Associates, Pittsburgh, Pennsylvania.

Arthur E. Neuman, Control Data, Minneapolis, Minnesota.
